

Belgium, 8th June 2018

To whom it may concern

The use of ozone for non-biocidal applications (*i.e. oxidation, bleaching*) is falling under the scope of the REACH regulation and requires a registration. REACH stands for **R**egistration, **E**valuation, **A**uthorisation and **R**estriction of **C**hemicals.

On 22th February 2018 an ozone REACH dossier was submitted on behalf of the Lead Registrant (*Xylem*), with *EurO3zon ivzw* mandated as Third Party Representative. Purchasing Access Rights (token) to the ozone REACH dossier is possible and therefore we kindly invite you to visit our website (<http://www.euro3zon.org>).

When you are producing one (1) or more tonnes of ozone per year then EurO₃zon offers access to the ozone REACH dossier as co-registrant.

The purchase of Access Rights (token) to the Joint Submission of the ozone REACH registration dossier is organised in a secure and transparent way via the EurO₃zon REACH 'LoA shop' and involves 9 steps (<http://www.euro3zon.org/LoA/IndexReach>).

After receiving the token the LoA-customer has to complete his own co-registration via REACH-IT at ECHA. This requires either a three-step or four-step process, as follows:

- 1) REACH-IT (ECHA) account creation
- 2) Purchasing access to the ozone REACH dossier,
- 3) If required: submitting an Article 26 inquiry (*only relevant for co-registrants that were not pre-registered*) (*),
- 4) Completing the co-registration (*).

(*) EurO₃zon can provide the co-registrants with a **Data Support Package** for the Article 26 inquiry and for the co-registration dossier. This package includes 2 guidance documents and 2 Master files for supporting the ECHA inquiry process (Article 26) and for supporting the REACH co-registration dossier. To purchase the **Data Support Package**, please contact us via our "Support" page, which becomes visible after successfully applying for an account. The **Data Support Package** enables LoA customers to complete the co-registration process at ECHA more independently of third parties. **If you are not familiar with REACH-IT, IUCLID, etc., it is advisable** to hire a consultant for completing the inquiry and/or co-registration dossier.

In case you remain with further questions please feel free to contact us.

Yours sincerely,

The EurO₃zon REACH team
